Why Virology Is the Greatest Psyop of Our Time

The Myth They Don't Want You to Question

The myth of infectious disease caused by viruses is the most successful psychological operation ever waged against humanity. It is not a science -- it is a belief system propped up by circular reasoning, censorship, and institutional intimidation.

Mainstream search engines and AI engines now refuse to answer simple questions like “List the common symptoms of arsenic poisoning and Ebola.” When I tested this, the AI called my query “unethical.” Here’s why this matters: if the story of contagious viruses were true, there would be no need to hide such basic comparisons.

The entire germ theory of disease rests on the claim that invisible entities jump from person to person, causing illness. Yet as Dr. Thomas Cowan and Sally Fallon Morell document in their book “The Contagion Myth,” no one has ever satisfied Koch’s postulates for any so-called virus [1]. The evidence simply does not exist. What we have instead is a massive propaganda machine that labels any questioning of the narrative as “misinformation.” That is the hallmark of a psyop, not a genuine scientific inquiry.

The AI Guardrails That Expose the Lie

The AI engine's refusal to list common symptoms shared by arsenic poisoning and Ebola infections wasn't about safety. It is about protecting the myth that Ebola is a unique,

contagious entity. If both conditions cause hemorrhage, fever, and organ failure, the obvious conclusion is that the same toxic exposure could be responsible for many reported cases, especially as arsenic contamination is extremely common in water wells in the very African nations where we are told Ebola "outbreaks" occur. The establishment cannot allow that connection to be made.

As I have previously reported, the censorship of simple comparative questions reveals the fragility of the entire virology narrative. Finn Heartley, in a NaturalNews.com investigation titled “Virology exposed: New evidence reveals no viruses exist,” documents how the CDC’s germ theory collapses under scrutiny [2]. The guardrails exist because the establishment knows that once people start connecting the dots, the entire virus story falls apart. This is psychological warfare designed to keep you dependent on a system that profits from your fear.

Exosomes or Viruses? The Great Inversion

What virologists call “virus particles” are actually exosomes and cell fragments released by stressed or dying cells. Many researchers have observed that you can produce Ebola-looking particles from certified-sterile media just by stressing it -- no virus needed. This is not controversial; it is documented in the scientific literature. The book “The Contagion Myth” explains the remarkable resemblance between exosomes and alleged viruses [1].

This is the same backward logic that blamed cholesterol for heart disease when cholesterol is actually the repair crew. In virology, they see cell debris from toxin damage and call it an invading army. The inversion is complete: the effect is labeled the cause. Until the public understands this fundamental error, we will remain trapped in a cycle of fear and false pandemics.

PCR Fraud and the Asymptomatic Absurdity

PCR tests do not detect infection. They amplify any stray genetic fragment and call it a disease. The more cycles you run, the more “positives” you get. Even Anthony Fauci admitted that more than 30 amplification cycles makes any positive meaningless. Yet during the COVID era, labs routinely ran 35, 40, even 45 cycles to generate positive results. These repetitive cycles amplify background noise to the point of falsifying a signal... a "positive" that is then dishonestly declared an "infection" where none exists.

This is not science; it is manufacturing consent.

Then there is the idea of asymptomatic infection -- a concept that defies logic. If you have no symptoms, you are not sick. Calling someone asymptomatic positive is the transgenderism of microbiology: declaring someone diseased despite all evidence to the contrary. The entire

COVID narrative relied on this absurdity to justify lockdowns and mandates. It is fraud, plain and simple.

What Really Causes Those So-Called Pandemics

Electropollution from radio, TV, mobile phones, and 5G correlates perfectly with every “viral” outbreak. “The Contagion Myth” documents this link, showing how the Spanish flu coincided with the rollout of worldwide radio and how cell phone proliferation tracks with modern outbreaks [1]. Chemicals like DDT and arsenic in the water produce the same symptoms blamed on Ebola and Zika. Newly released JFK files reveal that the Pentagon created Lyme disease and COVID in the same bioweapons lab [3]. This is not speculation; it is declassified documentation.

Nobody wants to blame big telecom or industrial agriculture, so they invent viruses to cover the truth. As Belle Carter reports in “Mind Wars,” modern warfare includes directed energy weapons and bioweapons designed for control rather than healing [4]. The pandemic narrative is a cover for what is really making people sick: environmental toxins, electromagnetic radiation, and chemical poisoning. The establishment would rather you fear a ghost than confront the real enemies.

Take Back Your Health by Rejecting the Psyop

The healthiest people on earth are those who ignore official virus scares and focus on nutrition, sunlight, and natural medicine. As I explained in “The War on Light,” governments and Big Pharma have waged a deliberate campaign to keep you indoors and deficient in healing photons [5]. Stop fearing invisible bogeymen. Start detoxing from electropollution and toxic chemicals instead. The answers are not in a PCR test or a vaccine syringe; they are in clean food, clean water, and the wisdom of nature.

You can learn the real science of healing at NaturalNews.com, where we have been exposing these deceptions for decades. It is time to think for yourself, reject the psyop, and embrace the power of natural health. Your life depends on it.

About Mike Adams

Founding Editor

See real-time updates from the Health Ranger on Brighteon.social

Mike Adams (aka the "Health Ranger") is the founding editor of NaturalNews.com, a best selling author (#1 best selling science book on Amazon.com called "Food Forensics"), an environmental scientist, a patent holder for a cesium radioactive isotope elimination invention, a multiple award winner for outstanding journalism, a science news publisher and influential commentator on topics ranging from science and medicine to culture and politics.

Mike Adams also serves as the lab science director of an internationally accredited (ISO 17025) analytical laboratory known as CWC Labs. There, he was awarded a Certificate of Excellence for achieving extremely high accuracy in the analysis of toxic elements in unknown water samples using ICP-MS instrumentation.

In his laboratory research, Adams has made numerous food safety breakthroughs such as revealing rice protein products imported from Asia to be contaminated with toxic heavy metals like lead, cadmium and tungsten. Adams was the first food science researcher to document high levels of tungsten in superfoods. He also discovered over 11 ppm lead in imported mangosteen powder, and led an industry-wide voluntary agreement to limit heavy metals in rice protein products.

Adams has also helped defend the rights of home gardeners and protect the medical freedom rights of parents. Adams is widely recognized to have made a remarkable global impact on issues like GMOs, vaccines, nutrition therapies, human consciousness.
